

Hebonilube P103 2kg/4kg/6kg/8kg

Automatic Lubrication Systems

*with stirring peddle and low level control

*with stirring peddle and follower plate

- Max. 3 elements mountable
- For on-off road equipment, industry and marine equipment
- Power source DC 12V/24V, AC 220
- 2-4 cc/min element, optional elements with adjustable output
- Internal/external controller (maximizes the ease of use)

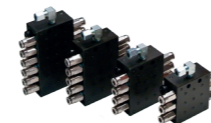

The lubrication systems of Hebonilube lubricate your equipment automatically while the machine is operating. Not one lubrication point is skipped, you reduce maintenance costs and avoid unnecessary downtime.

On-off road machines have to work under the most extreme conditions. The heavy loads on pins, bearings and moving parts are lubricated regularly with the right amount of lubricant. Lubrication is optimal for on/off-road machines, because the applied NLGI-2 grease withstands peak-loads and vibrations.

For **industrial** processes we have the perfect customized solutions for fully automatic and centralized lubrication. Ensuring the continuity of the production and increasing the operational state of the industry.

In case a new machine will be added to the line, the capacity of the lubrication system can be expanded with progressive distributors.

*HDS progressive distributors, up to 16 outlets

For **marine equipment** the Hebonilube automatic lubrication systems are all delivered with stainless steel progressive distributors and couplings. The pumps are waterproof.

Hebonilube ML127 Spider Pump

- Max. 27 elements directly mountable
- For on-off road equipment, industry and marine equipment
- Integrated timer with easy control to adjust interval of lubrication
- Power source DC 12V/24V
- 0,01 – 0,12 cc/min element, optional elements with adjustable output
- Transparent plastic 1.5 litre reservoir suitable for oil and grease of NLGI 0 to 2

Brolube Grease Gun LG1800 18V

- Rechargeable batteries (2x), 1700 MA Ni/Mh
- Fast charger for 2 hours charge time
- Self-locking trigger
- Battery capacity display
- 30" flexible hose with spring guard
- Delivers up to 8.000 psi/ 550 bar
- 3-way refilling: Bulk, cartridge or pump
- Solid carrying case

Optional:

- Heat blanket for grease reservoir

Environmentally friendly batteries!
Makes no use of Cadmium! 

ALSO IN OUR PRODUCT LINE

Brofil Cab Filtration & Pressurization Systems

We offer Brofil for:

- On-off road equipment
- Marine equipment
- Commercial buildings
- Waste disposal companies
- Mobile offices

These systems are designed to supply clean filtered air in to the cabin and when the cabin is sufficiently air tight, it will create a pressurized atmosphere in the cabin.

Due to this pressurization of clean filtered air no pollutants are able to enter the cabin. There are several types of protective filter combinations available to optimise the result.

Please ensure you are using the right combination of filters and in case of any doubt our staff will gladly advise you!
